PROFESSIONAL EXPERIENCE

TribalDDB – Dallas, TX

July 2006 – Sept 2009

Application Developer

Built primary and promotional websites for major clients including Pepsi, American Airlines, and Exxon Mobile. Major achievements include:

- Responsible for pushing agency client sites to full PHP5 compliance.
- Rewrote the Pepsi "Preference Center" (<https://account.pepsiworld.com/>) using Zend Framework 1.8.x using a web-service back-end data interface.
- Maintained balance between functionality and performance for heavily trafficked promotions.
- Created and maintained an internal framework built on top of Zend Framework to assist in our development and deployment of promotional sites.
- Restructured internal SVN system to use post-commits for instant updates to STG and DEV environments.
- Primary developer of GrowMyRestaurant.com, aataf.com, account.pepsiworld.com (aka account.mountaindew.com).
- Responsible for backend coding and maintenance of <http://fly.aa.com/promo> quarterly promotions.
- Assisted in development in number of promotional websites, including the now down MountainDew GameFuel site (<http://www.mountaindewgamefuel.com/>) and new DewMocracy DesignChallenge site (<http://www.dewmocracy.com/designchallenge/>)

EDS – Dallas, TX

November 2003 – July 2006

Systems Administrator

Responsible for overseeing web development projects on EDS' contractor intranet site. In addition to managing the development and streamlining of the proprietary in-house inventory system. My achievements include:

- Converted internal website from HTML/Perl to PHP using custom built framework.
- Converted internal website from Apache Auth to PHP Session/Database login using a triple validation system: Hash key, Session ID and login credentials.
- Redeveloped in-house inventory application scripts to automate processes for inventory tracking from 100 servers to over 400 servers while minimizing manual intervention.
- Responsible for maintenance and administration of Open Source products used in house.

Peace Software – Denver, CO

October 2001 – February 2003

Developer

Responsible for deployment and integration of Peace Software's *Engery* Software on client site projects. My achievements include:

- Deployed their product *Engery* onto client networks.
- Built Perl based custom EDI scripts for clients.
- Debugged/fixed approximately 15 reported bugs a week.
- Debugged and developed applications using Perl, 4GL and Java.

Firstworld Communications – Denver, CO

July 2000 – August 2001

Software Developer

Responsible for developing scripts and applications that managed user accounts in Firstworld's provisioning system. My achievements include:

- Created client site from scratch using custom built Perl Framework.
- Sole creator of large scale user account provisioning system.
- Successfully converted and deployed 20k+ users onto said system.

CONSULTING EXPERIENCE

Translucent Technologies – Dallas, TX

January 2005 – Present

Consultant

Responsible for developing and maintaining client websites

- Created client site from scratch using custom built PHP Framework.
- Created client site using CakePHP Framework.
- Currently developing a website using the Zend Framework.
- Active maintainer of three client websites.
